Create Bucket:

1 Step:

2 Step:

3 Step: types of permissons

	ock <i>all</i> public access rning this setting on is the same as turning on all four settings below. Each of the following settings are independent of one another.
	Block public access to buckets and objects granted through <i>new</i> access control lists (ACLs) S3 will block public access permissions applied to newly added buckets or objects, and prevent the creation of new public access ACLs for existing buckets and objects. This setting doesn't change any existing permissions that allow public access to S3 resources using ACLs.
	Block public access to buckets and objects granted through <i>any</i> access control lists (ACLs) S3 will ignore all ACLs that grant public access to buckets and objects.
	Block public access to buckets and objects granted through <i>new</i> public bucket or access point policies S3 will block new bucket and access point policies that grant public access to buckets and objects. This setting doesn't change any existing policies that allow public access to S3 resources.
L	Block public and cross-account access to buckets and objects through any public bucket or access point
	policies S3 will ignore public and cross-account access for buckets or access points with policies that grant public access to buckets and objects.

4 Step: Versioning

5 Step: Tags

Tags (0) - optional Track storage cost or other criteria by tagging your bucket. Learn more ☑	
No tags associated with this bucket. Add tag	

6 Step: Encryption

7 Step: Finish
